EDUCATION

Master's of Computer
Applications
Computer Science and IT

Jain University

📅 2022 - 2024

📍 Bengaluru

Bachelor in Science

A.E. Kalsekar College

📅 2018 - 2021

📍 Thane

SKILLS

- Programming & Development: Python, C#, JavaScript, .NET (ASP.NET Web API), Node.js, Django, React.js, Angular, PostgreSQL, MongoDB
- Artificial Intelligence & Computer Vision - OCR & NLP: Tesseract, PyTesseract, Hugging Face Transformers, SpaCY, NLTK. Object Detection & Image Processing: YOLO, OpenCV, NumPy, Pandas. ChatGPT, Copilot etc.
- Backend & API Development - RESTful APIs, FastAPI, Flask. Security & Authentication: JWT, OAuth, HTTPS, Cryptography
- Development Workflow & Tools: Git, GitHub, Scrum, Jira

SUMMARY

Dynamic Full Stack Developer with robust expertise in both web development and emerging AI technologies. With proven experience in designing scalable APIs and driving end-to-end development in fast-paced startup environments, I have crafted innovative AI solutions to streamline data extraction and enhance application functionality. My work includes developing advanced OCR systems using Python, Tesseract, and Hugging Face Transformers to convert unstructured data into actionable insights. Adept at integrating cloud platforms and automating deployment pipelines, I bring a unique blend of technical acumen and creative problem-solving to build secure, high-performance applications that drive business success.

WORK EXPERIENCE

Full Stack Developer

VBooks

📅 Sep 2024 - July 2025

📍 Remote

- Architect robust backend solutions using Python and .NET, designing scalable microservices for reliable, high-performance systems.
- Engineered secure RESTful APIs with Node.js, integrating diverse data sources and third-party services seamlessly.
- Design dynamic, responsive frontends with React and Python-driven integrations, ensuring intuitive user experiences and optimized performance. Leveraged AI Tools like ChatGPT to speed development.
- Integrate AI-based OCR services using Python, Tesseract, and PyTesseract, delivering accurate data extraction from scanned documents.
- Optimize system performance with Python's asynchronous programming, effective caching strategies, and efficient resource management techniques.
- Implement CI/CD pipelines with GitHub Actions and Docker, streamlining deployments and ensuring rapid, stable releases.
- Collaborate in Agile teams using Python-driven solutions, conducting thorough code reviews and mentoring peers for continuous improvement.

Full Stack Developer

Find My Options

📅 Nov 2022 - Sept 2024

📍 Remote

- Developed and maintained a scalable full-stack application, migrating the frontend from Angular to React to enhance performance and user experience.
- Built and optimized RESTful APIs using C# and .NET, improving platform functionality and data processing.
- Designed and managed a PostgreSQL database to store user and vehicle listing data efficiently.
- Led the integration of CI/CD pipelines using GitHub Actions, enhancing deployments and Used AI tools to accelerate development cycles.
- Implemented an AI-powered object detection system using YOLO (You Only Look Once), OpenCV, and TensorFlow to identify the positioning of car images.
